

Advanced VLSI Design Verification

**From Digital Fundamentals to
*Industry-Standard Verification***

4 Months

Industry Focused

Hands - On Experience

THE WORLD RUNS ON SILICON.

**From AI and electric vehicles to 5G and cloud computing,
the technologies shaping tomorrow begin with
semiconductor innovation.**

Every powerful chip needs to be **designed.
Every reliable chip needs to be **verified**.**

That's where

Design Verification begins.

INDIA IS INVESTING IN THE FUTURE OF SEMICONDUCTORS.

The ecosystem is growing. The opportunities are growing with it.

ISM 1.0 — BUILDING THE FOUNDATION

₹76,000 CRORE

Committed to strengthening India's semiconductor and display manufacturing ecosystem. Supporting the development of semiconductor fabs, display fabs, ATMP/OSAT facilities and the wider chip-design ecosystem.

10 MAJOR PROJECTS

*Approved across multiple states, representing planned investment of approximately ₹1.6 lakh crore.**

ISM 2.0 — THE NEXT CHAPTER

₹1.27 LAKH CRORE

A proposed new allocation aimed at accelerating India's semiconductor ambitions, with greater focus on:

SUPPLY CHAINS • EQUIPMENT • MATERIALS • ADVANCED MANUFACTURING

THE MESSAGE IS CLEAR.
SEMICONDUCTORS AREN'T JUST THE FUTURE.
THE FUTURE IS BEING BUILT NOW.

Build the skills to be part of it.

INDIA'S SEMICONDUCTOR MOMENTUM

FROM AMBITION TO PRODUCTION

India's semiconductor ecosystem is entering a new phase of growth.

2025

10 PROJECTS

Approximately ₹1.60 lakh crore in approved investment across semiconductor projects in six states as of December 2025.

2026

12 PROJECTS

The approved semiconductor manufacturing pipeline has grown to 12 projects, with cumulative investment of more than ₹1.64 lakh crore. Three facilities have already started commercial production.

THE GROWTH

10 → 12

20% increase in the number of approved manufacturing projects compared with the 10-project position reported at the end of 2025.

₹1.60 LAKH CR → ₹1.64+ LAKH CR

The investment pipeline has continued expanding as additional semiconductor projects have been approved.

Don't Learn VLSI

Learn How Verification Works

Silicon Vista bridges the gap between academic knowledge and industry expectations through structured, practical learning in ASIC Design Verification.

Your Journey Starts Here

01

BUILD THE FOUNDATION

Strengthen your understanding of digital electronics and core design concepts.

02

LEARN THE LANGUAGE

Develop practical skills in Verilog and SystemVerilog.

03

MASTER VERIFICATION

Explore assertions, functional coverage and industry-standard UVM methodology.

04

UNDERSTAND REAL PROTOCOLS

Build verification knowledge with protocols including APB, AXI and I²C.

05

PREPARE FOR THE INDUSTRY

Connect your technical knowledge with practical verification workflows and career-focused skills.

Build your foundation. **Develop** your skills. **Begin** your VLSI journey.

YOUR ROADMAP TO DESIGN VERIFICATION

*One structured journey. From digital fundamentals
to industry-standard verification.*

01

DIGITAL ELECTRONICS

Build the Foundation

- Number Systems
- Logic Gates
- Combinational & Sequential Circuits
- FSM

02

VERILOG HDL

Design with Hardware

- Verilog Basics
- RTL Coding
- Testbench
- Simulation

03

SYSTEMVERILOG

Step Into Modern Verification

- Data Types
- Arrays
- Interfaces
- Randomization
- IPC
- OOPS

04

ASSERTIONS & COVERAGE

Verify with Confidence

- SystemVerilog Assertions (SVA)
- Functional Coverage
- Covergroups

05

UVM

Build Scalable Verification Environments

- UVM Components
- Sequences Driver & Monitor
- Agent Scoreboard
- Environment
- Test Creation

06

INDUSTRY PROTOCOLS

Work with Real-World Interfaces

- APB
- AXI
- IFC

CHOOSE HOW YOU LEARN.

ONE GOAL. TWO FLEXIBLE LEARNING MODES.

Four months of structured learning designed to build practical Design Verification skills.

ONLINE BATCH

4 MONTHS

- Live interactive online classes
- Learn from anywhere
- Structured mentor-led sessions

OFFLINE BATCH

4 MONTHS

- Classroom-based training
- Direct learning environment
- Weekday & weekend batches available

PROGRAMME FEES

ONLINE

₹25,000

OFFLINE

₹35,000

Flexible payment options available.

YOUR VLSI JOURNEY. YOUR WAY.

Choose your learning mode and start building industry-relevant skills.

FROM LEARNING CONCEPTS TO BUILDING CAPABILITY.

Knowledge is the foundation. Application is what turns it into skill.

BUILD STRONG FOUNDATIONS

Understand digital design fundamentals and core logic concepts.

DEVELOP RTL SKILLS

Build practical skills in Verilog, RTL coding and simulation.

MASTER MODERN VERIFICATION

Apply SystemVerilog, assertions, functional coverage and UVM.

WORK WITH REAL PROTOCOLS

Develop verification knowledge with APB, AXI and I²C.

*The Goal Isn't Just To Complete A Course
It's To Think Like A Verification Engineer*

YOUR FIRST ROLE IS **JUST THE BEGINNING.**

Build your skills today. Grow your possibilities tomorrow.

START YOUR JOURNEY

VLSI TRAINEE

Build your foundation

DESIGN VERIFICATION ENGINEER

Apply your skills

SENIOR / LEAD ENGINEER

Take on complex challenges

VERIFICATION ARCHITECT

Shape the bigger picture

FROM YOUR FIRST LINE OF RTL

TO LEADING THE FUTURE OF SILICON.

Why Silicon Vista

BECAUSE YOUR CAREER DESERVES MORE THAN THEORY.

Learn with purpose. Practice with confidence. Prepare for the industry.

HANDS-ON LEARNING

Go beyond concepts with practical exercises and application-focused training.

INDUSTRY-RELEVANT SKILLS

Build knowledge around tools, methodologies and workflows used in modern verification.

EXPERT GUIDANCE

Learn with structured support designed to strengthen both concepts and practical understanding.

REAL-TIME PROJECT EXPOSURE

Apply what you learn through practical verification challenges and project-oriented experience.

LEARN. APPLY. VERIFY. GROW.

Your journey into the semiconductor industry starts with the right foundation.

YOUR JOURNEY INTO DESIGN VERIFICATION STARTS HERE.

***The semiconductor industry is moving forward.
Are you ready to move with it?***

**LEARN THE FUNDAMENTALS.
BUILD PRACTICAL SKILLS.
*PREPARE FOR THE INDUSTRY.***

*Whether you're beginning your VLSI journey or looking
to strengthen your verification skills, take the next step with **Silicon Vista**.*
